Add a device

Before adding a device, ensure that it is connected to the power. Also ensure it is paired with the TPF-Eco thermostat, which is needed to measure the room temperature.

- Open the Tydom application, then tap the menu icon at the top left of the screen to access the settings.
- Tap the 'My devices' line.
- Tap `Add a device´, `Heating´ and then `Electrical´
- The list of devices is displayed. For your heater with the RF receiver please select „Minor 1000"

MINOR 1000
RF 6620
RF 6630
RF 6640

- To begin the assignment, first press the button on the receiver for about 3 seconds. The LED starts to light up. When it lights on the TYDOM app then tap ‚Associate'.
- When your device is associated, it appears in the 'My devices' list, and you can then personalise it.

press 3 sec.

Your heater with the RF receiver is now connected to the app and can be configured there.

Troubleshooting information:

- The RF Receiver needs to do be set to X3D mode to connect. If the RF receiver is not connecting to the app, try switching pairing channel by holding down the receiver button for 40 seconds.
- Panel needs to be within range of the Eco interface.
